

Matthew Wagner

1301 11th St., Bedford, IN 47421

T: 812-508-4791 E: matthew.wagner@hotmail.com

Objective To participate in an accomplished company working in web design and development.

Experience **The Alpha Story** 2010-Present

A personal portfolio site to display my freelance work.

<http://www.thealphastory.com>

Busch Monuments May 2011

Client requested pre-existing WordPress theme for ease of use in content updates and photo uploads. I was tasked with setting up the WordPress layout for use on this website, but the client needed a photo gallery and a contact form on the website and needed the website usable within a short deadline.

Education **The Art Institute of Indianapolis** 2010-Present

Studying web design and interactive media; students are expected to have a good comprehension of designing for both print and web mediums. Students study web design, graphic design, programming, multimedia creation, blogging, and mobile development.

Skills Software: Adobe Photoshop, Illustrator, InDesign, and Dreamweaver

Programming: HTML, CSS, JavaScript, PHP, jQuery, and Actionscript

Letter of Recommendation

Jason McIntosh

To Whom It May Concern:

Matt Wagner has been a student of mine in the Web Design and Interactive Media program at the Art Institute of Indianapolis for over a year. I have had Matt for at least four classes in that time and he is also the President of our student group, The New Media.

In the time Matt has been here he has showed major initiative and effort in the different web technologies and topics we cover in class. I know that I can always count on him to put in the extra effort and go above and beyond the requirements. Not only that, but he learns on his own outside the classroom technologies and topics that he has yet to experience. He juggles school, work, and his family life to the best of his ability and has rarely ever let his school work slide.

Above this Matt is always willing to lend a hand to his fellow students who may need help in a class that he is taking or has already taken. He's willing to pass on knowledge that he has learned for the betterment of his peers. Finally, and I feel most importantly, Matt is not afraid to ask questions. This is not something I always find in students. If he can't find the answer, he will ask to get to a quicker resolution, which helps in the long run of a shorter project timeline.

I would highly recommend him for your PHP developer role.

Sincerely,

Jason McIntosh
Instructor, The Art Institute of Indianapolis
